â??Impact 2.0: Collaborative technologies connecting research and policyâ?•

Description

Tweet

â??Impact 2.0: Collaborative technologies connecting research and policyâ?• is a two-year research project that seeks to develop a body of knowledge about the use of Web 2.0 in policy-oriented research and design in Latin America and to identify, document and promote good practices and emerging opportunities related to the use of collaborative technologies for linking research to policy.

In order to achieve this goal Impact 2.0 has two components. The first involves three pilot projects that seek to combine to combine current theory on the relationship between research, policy and advocacy with advances in Web 2.0/Social networking technologies and practices. The second is a fund to support research into the use of Web 2.0 tools and behaviours to link research and policy.

The research fund will consider two types of proposals: Type 1 projects will involve both implementing a specific intervention using Web 2.0 to link policy and analyzing, documentating and evaluating the intervention while Type 2 projects will document and evaluate one or more current or recent projects making use of Web 2.0 to link policy and research. A maximum of US$15,000 is available for Type 1 projects and US$7,500 for Type 2.

Independent researchers and organisations (universities, government agencies, NGOs, research centres) are invited to apply. Applicants must reside in Latin America and the projects to be performed and analyzed must also be located in and relevant to the region.

Full details are available in the attached CFPs or in Spanish at http://impacto2.comunica.org and in English at http://impacto2.comunica.org/?page_id=23

Impacto 2.0 is a project of FundaciÃ¯Â¿Â½n Comunica, with the financial support of the International Development Research Centre (IDRC) and the participation of APC, DIRSI, PRODIC of the University of the Republic of Uruguay and CIESPAL.
