by Sara Asadullah & Soledad MuÃ±iz, 2015 Available as pdf via this webpage

â??The toolkit is designed to support you in planning and carrying out evaluation using PV with the MSC technique, or PVMSC for short. This is a participatory approach to monitoring, evaluation and learning that amplifies the voices of participants and helps organisations to better understand and improve their programmesâ?•

Rick Davies comment:â??The advice on handling what can be quite emotional moments when people tell
stories that matter to them is well said, and is often not covered in text or training introductions to MSC. The advice on taking care with editing video records of MSC stories is also good, addressing an issue that has always niggled me.â??
