BOND Quality Group â?? Debate on logframes

Description

Tweet

Date: 2-5.30pm 11th June 2009
Venue: NCVO offices, N1 9RL, London

For more information contact: Alex Jacobs <alex@keystoneaccountability.org>

Motion: this meeting believes that the logframe is the right tool for managing most NGO work

Logframes (Logical Framework Analysis) are very widely used in NGOs. But they split opinion sharply throughout the sector: some people love them, some hate them.

To their supporters, logframes provide a simple short way of summarising a projectâ??s aims and activities. They force staff to map out the intermediary steps that link activities and overall goals. They can be applied at any level, from an entire organisation to one specific project. They help managers and donors alike by providing a guide to action and a set of indicators to monitor progress, which be can conveniently communicated to other people. Many different approaches can be used to create logframes, including participatory methods.

To their detractors, logframes force staff to think in an inappropriate way. They assume that complex social systems can be predicted in advance and that social problems reduced to a single problem statement. They do not take account of different peopleâ??s views and priorities (e.g. within communities), and they are based on an inappropriate linear logic (if A happens, then B will happen, then C). In practice, they are inflexible, creating a strait-jacket for relationships with partners and communities, which undermines outsidersâ?? ability to respond effectively to changing realities on the ground. They create bureaucratic paperwork, and are most useful for donors and senior managers.

What are the arguments and evidence for each side of the debate? Come along, listen to some expert opinion, debate the issues with your peers.

Speakers:

- Proposing: Peter Kerby (DFID) & Claire Thomas (Minority Rights International)
- Opposing: Robert Chambers (IDS) & Rick Davies (independent)

Presentations made by:

- Rick Davies

Voting Results (before and after debate)

Table 1: Votes before the debate

	For	Against	Abstain	Total
Women	9	14	1	24
	38%	58%	4%	
Men	3	5	1	9
	33%	56%	11%	
Total	12	19	2	33
	36%	58%	6%	

	For	Against	Abstain	Total
Large org	6	4		10
	60%	40%		
Small org	1	13		14
	7%	93%		
Total	7	17		24
	29%	71%		

Table 2: Votes after the debate

	For	Against	Abstain	Total
Women	6	13	1	20
	30%	65%	5%	
Men	2	4	1	7
	29%	57%	14%	
Total	8	17	2	27
	30%	63%	7%	

	For	Against	Abstain	Total
Large org	2	5		7
	29%	71%	0%	
Small org	2	11		13
	15%	85%	0%	
Total	4	16	0	20
	20%	80%	0%
