

# The Book of Why: The New Science of Cause and Effect

## Description

by Judea Pearl, [Allen Lane](#), May 2018

[Tweet](#)

Publisher blurb: “Correlation does not imply causation.” This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl’s discoveries have enabled machines to think better, The Book of Why explains how we can think better.

[Introduction: Mind over data \(pdf copy\)](#)

[Chapter 1: The Ladder of Causation \(pdf copy\)](#)

# CONTENTS

<i>Preface</i>	<i>ix</i>
INTRODUCTION Mind over Data	1
CHAPTER 1 The Ladder of Causation	23
CHAPTER 2 From Buccaneers to Guinea Pigs: The Genesis of Causal Inference	53
CHAPTER 3 From Evidence to Causes: Reverend Bayes Meets Mr. Holmes	93
CHAPTER 4 Confounding and Deconfounding: Or, Slaying the Lurking Variable	135
CHAPTER 5 The Smoke-Filled Debate: Clearing the Air	167
CHAPTER 6 Paradoxes Galore!	189
CHAPTER 7 Beyond Adjustment: The Conquest of Mount Intervention	219
CHAPTER 8 Counterfactuals: Mining Worlds That Could Have Been	259
CHAPTER 9 Mediation: The Search for a Mechanism	299
CHAPTER 10 Big Data, Artificial Intelligence, and the Big Questions	349
<i>Acknowledgments</i>	<i>371</i>
<i>Notes</i>	<i>373</i>
<i>Bibliography</i>	<i>377</i>
<i>Index</i>	<i>405</i>
