â??Realist evaluation â?? understanding how programs work in their contextâ??; An expert seminar with Dr. Gill Westhorp; Wageningen, the Netherlands; 29-03-2011

Description

Tweet

FormDate: 29-03-2011
Venue: Wageningen, the Netherlands

Dear colleague,

With pleasure we would like to announce an expert seminar with Dr. Gill Westhorp on 29th March 2011: â??Realist evaluation â?? understanding how programs work in their contextâ??.

â??Realist evaluation (Pawson and Tilley, 1997) is one type of theory based evaluation. It aims to explore â??what works, for whom, in what contexts, to what extent and howâ?•. It adopts a particular understanding of how programs work, and uses a particular format for program theories to help guide evaluation design, data collection and analysis.

Realist evaluation has a particular focus on understanding the interactions between programs and their contexts and the ways that these influence how programs work. Evaluation expert Dr. Gill Westhorp will discuss the concepts and assumptions that underpin this theory based evaluation approach. What is it that realist evaluation brings to the table of evaluating development programs? How is it different from existing approaches in evaluation in development? How does it understand, and deal with, complexity? What new insights can help strengthen the utility of evaluation for development?

During the morning, Gill will introduce the basic assumptions and key concepts in realist evaluation. She will also briefly demonstrate how these ideas can be built into other evaluation models using two examples. These models â?? realist action research and realist program logic â?? are participatory models which were designed for use in settings where limited resources, lack of capacity to collect outcomes data, complex programs, and (sometimes) small participant numbers make evaluation difficult. In the afternoon, the practical implications for evaluation design, data collection and analysis will be discussed. Examples and practical exercises will be included throughout the day.

For those interested and not to far away around that time, please do come and join this interesting event!

Please find attached the Factsheet flyer and Registration Form form. We also suggest you make an early hotel booking (http://www.hofvanwageningen.nl/?language=en) as the hotel is already quite full. Please indicate to the hotel that you are booking a room for the â??expert seminar realist evaluationâ??.

Note: the expert seminar with Dr. Michael Quinn Patton on â??developmental evaluationâ?? unfortunately had to be cancelled due to personal reasons. We hope to organise another opportunity with him early next year.

Looking forward to meeting you here at the expert seminar on realist evaluation!

Cecile Kusters (CDI), Irene Guijt (Learning by Design), Jan Brouwers (Context, international cooperation) and Paula Bilinsky (CDI)
