5-day Outcome Mapping Training and Workshop in Switzerland

Description

Tweet

Date: 26 â?? 30 October 2009
Venue: Filzbach GL near Zurich, Switzerland

Agridea International is organising a training and workshop on Outcome Mapping in English language in Europe. Interested people working in development cooperation in southern and eastern countries as well as staff working in development and donor agencies in the North are invited to register. Besides an intensive introduction in OM as a tool for Project Cycle Management, the course has the objective to practise OM tools on the basis of own cases brought by the participants, and to combine OM tools with other M&E approaches.
