Free relevant well organised online courses: Statistics, Model Thinking and others

Description

Tweet

Provided FREE by Coursera in cooperation with Princeton, Stanford and other Universities

- Statistics One by Andrew Conway
- Model Thinking by Scott E. Page
- Introduction to Sustainablity by Jonathan Tomkin
- Social Network Analysis by Lada Adamic
- and many others that may be of interest (200+)

Each opening page gives this information: about the Course, About the Instructor, The Course Sylabus, Introductory Video, Recommended Background, Suggested Readings, Course Format, FAQs,

Example class format: â??Each week of class consists of multiple 8-15 minute long lecture videos, integrated weekly quizzes, readings, an optional assignment and a discussion. Most weeks will also have a peer reviewed assignment, and there will be the opportunity to participate in a community wiki-project. There will be a comprehensive exam at the end of the course.â?•

The contents of past courses remain accessible.

RD Comment: Highly Recomended! [I am doing the stats course this week]
