Cathy James, September 2011. 33 pages. Available as pdf.

The review approach Comic Reliefâ??s international grants team commissioned this review to capture staff and partnersâ?? experiences in using theory of change; to identify others in development that are using theory of change and analyse their different approaches; and to draw together learning from everyone to inform what Comic Relief does next.

The review combined analysis of literature with 32 short interviews of people with experience and knowledge of theory of change. The literature included reports, guidelines, study notes, theory of change examples and other relevant documents. The review included interviews with members of Comic Reliefâ??s international grants team; Comic Relief grant partners (both UK and southern organisations); freelance consultants; UK organisation development consultants and researchers; North American research organisations, consultancy groups and foundations; International Nongovernmental organisations (INGOs); and academics.
This report was commissioned by Comic Relief and written by Cathy James, an independent consultant. The views expressed in this report are those of the author and do not necessarily represent the views of Comic Relief
