Results, risk assessment and management in development cooperation â?? Towards a Common Approach

Description

Tweet

Date: 25 â?? 26 November 2010
Venue: Nordatlantens Brygge, Strandgade 91, Copenhagen

(From ODI website)

â??**The conference** is organised by the Danish Ministry of Foreign Affairs and co-hosted by The Humanitarian Policy Group at the Overseas Development Institute and the OECD/DAC International Network on Conflict and Fragility (INCAF).

Development cooperation is political in nature. This is particularly true in high-risk environments, where engagement impacts the behaviours, priorities, influence and power of different groups. High-risk environments could provide tremendous opportunities to deliver positive results, as long as international actors are prepared to take informed political and programmatic risks to facilitate the necessary change. However, current approaches are not always appropriate given the nature of the contexts concerned. There is also a difference between situations of fragility, humanitarian crises, or in other development contexts. Hence, risk analysis needs to take into account the specificities of each situation.

The international community lacks a concerted and agreed upon way to manage and mitigate risks. This conference will take stock on where we are now and what could be the path forward, and come up with a set of practical recommendations.

At the conference, key note speakers representing prominent international actors will discuss how they deal with risk and results management and participants will be provided with an opportunity to discuss lessons learnt from different country contexts in a set of work-shops and, looking ahead, suggest practical recommendations for follow up.

For further information regarding the conference, please click here.

To register please send your contact details to: riskconf@um.dk. Please indicate which of the three working groups you would like to participate in. Deadline for registration is November 5, 2010.â?•
